

EywaLink

Made Smart Factory Simple

- Edge computers powered by the EywaLink system, seamlessly integrate OT, IT, and CT
- Complete device connectivity, intelligent data analysis, and the realization of a truly smart factory.

WISH series

EywaLink

KUBER series

One-Finger Setup

Set up in seconds
simple, smart, intuitive

Auto Data Upload

Automatic data synchronization
between
edge and server

Multi-Protocol Support

Seamless integration
across OT
and IT systems.

Modular Application Design

Flexible, scalable,
and industry-ready

User Management Control

Secure
and role-based access
for every operator

EywaLink Architecture

Integrates OT, IT, and CT layers to build a unified smart factory platform

OT Device support

CNC	Mitsubishi	PLC	· Mitsubishi : FX0N · 2N · 3U · 3GA · 5U
	Siemens		· Fatek
	Fanuc		· Keyence: Studio · HostLink
			· Siemens:200 · 400 · S7 1200/1500
			· Sensor: SICK · Keyence FlowMeter · Electronic meter

IoT protocol supports

IoT	MODBUS · BACNET · API · Ethernet/IP · OPC UA · MQTT · MS SQL · SAP · CAN
-----	--

Factory Automation

Enhance production control,
equipment connectivity, and
predictive maintenance

Energy Management

Enable intelligent energy
management and resource
optimization

AI integration

Integrates AI features
for realtime
analytics, monitoring and alert
